00550 Series Breakaway Swivel

- The purpose of this product is to **protect the cable** being installed from overload, as well as **providing the function** of a **regular Line Swivel**. Typically, they are used during the **installation of Fiber Optic cables** where the swivel can be **pre-set to breakaway** at a **pre-determined load**, thus protecting the fibers or the conduit.
- **Breakaway pin kits** are **ordered separately** from breakaway swivels
- Breakaway **pin load ratings** are **within +/-10%**
- The Swivel is constructed of **stainless steel** and the breakaway **pins are color coded** for easy identification

Note: Breakaway pin kits not included with breakaway swivels and must be ordered from chart below.
